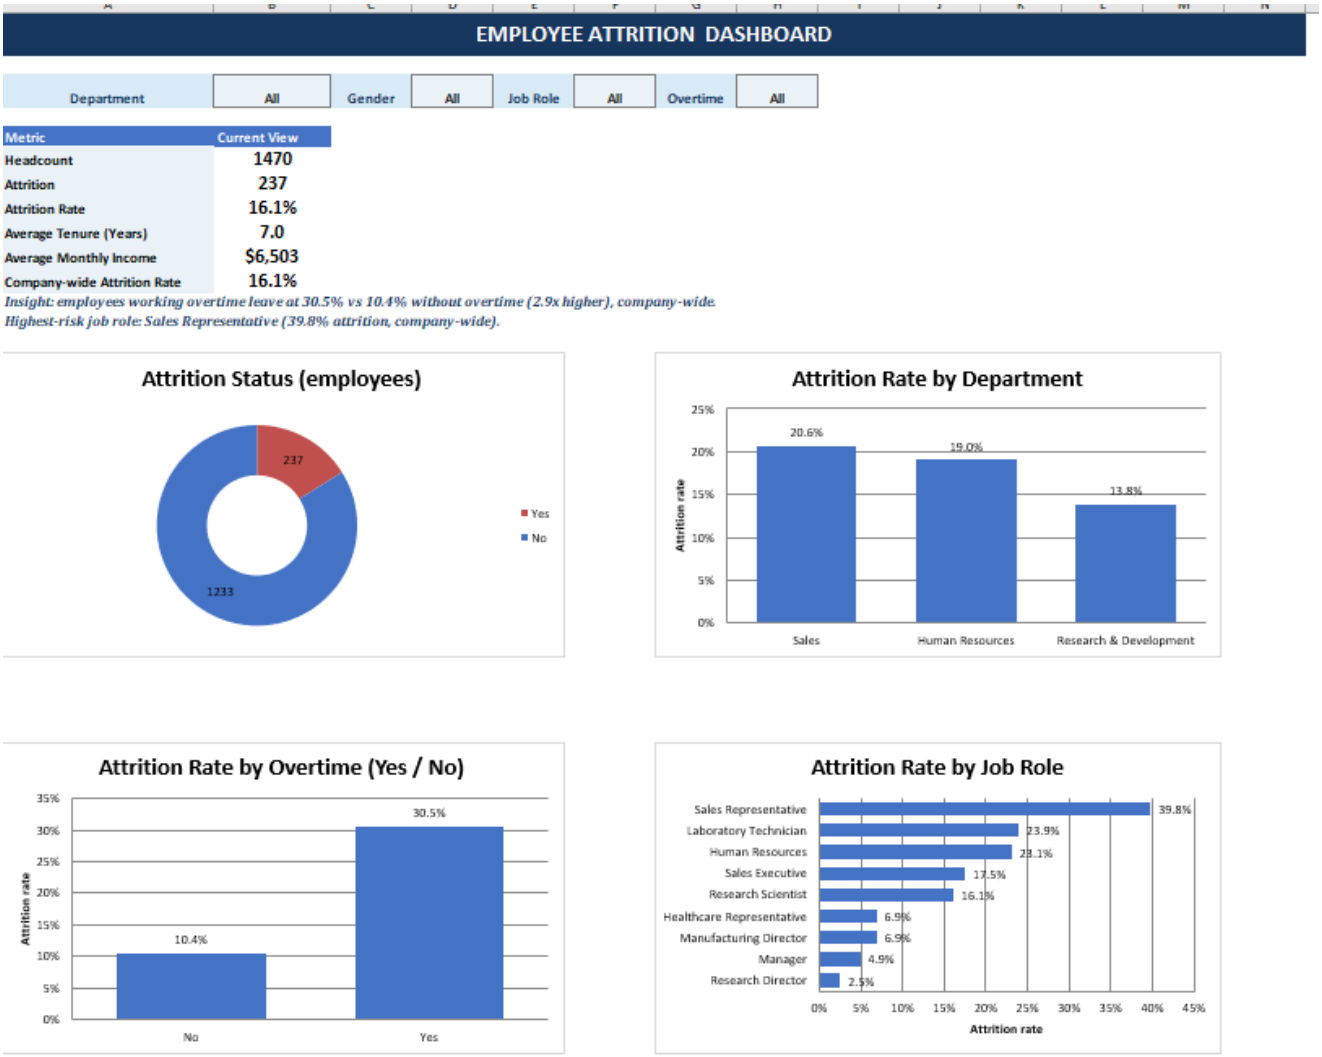
# HR Employee Attrition Dashboard

An interactive Excel dashboard that explores employee attrition and shows where it is highest. Built on the IBM HR Employee Attrition dataset (1,470 employees).



*Dashboard overview with all filters set to All*

## Features

- **Filters:** Department, Gender, Job Role and Overtime
- **KPI table:** headcount, attrition count, attrition rate, average tenure, average monthly income and company-wide attrition rate
- **Charts:** attrition status, attrition rate by department, by overtime and by job role
- **Insight lines** that call out the overtime effect and the highest-risk job role

## Key Insights

- Overall attrition rate is **16.1%** (237 of 1,470 employees)
- Employees working overtime leave at **30.5% vs 10.4%** without overtime (**2.9x higher**)
- **Sales Representative** is the highest-risk role (**39.8%**), followed by Laboratory Technician (23.9%) and Human Resources (23.1%)
- **Sales** has the highest attrition by department (**20.6%**), then Human Resources (19.0%) and Research & Development (13.8%)
- Average tenure is 7.0 years and average monthly income is $6,503

## Tools

Microsoft Excel: COUNTIFS / AVERAGEIFS formulas, dropdown filters (data validation), charts. Sheets: raw data, Calc (chart formulas) and Dashboard.

## How to Use

- Open **HR-Employee-Attrition-Dashboard.xlsx** and go to the **Dashboard** sheet
- Choose a Department, Gender, Job Role or Overtime value from the dropdowns; the KPIs and charts update
- Set every filter back to **All** to see the full company view
